X	<p>The following is a concise explanation of the relevance, as it is presently understood by the individual most knowledgeable about the content of the information, of each patent, publication, or other information listed that is not in the English language:</p> <p>H10-254653 – In the case that a trouble that the specified form size and the size of a selected paper feed port are different for instance is generated, the printer displays the message for indicating that the form size does not match, the user name and the job name at the display part of the of the operation panel of the printer and waits for the processing by a user.</p> <p>H10-100514 – A host apparatus transmits information containing a type of print data, paper size to be outputted, etc., to all network printers. A network printer itself judges whether it can print the print data on a required size of a paper. If it is possible, transmission request is sent in order to receive the print data from the host apparatus and print it.</p> <p>H9-314925 – The device determines whether the paper sizes conform to each other or not. If no paper sizes are conformed to a page size, the printing data is stored in a hard disk device. Until when a paper or conforming size is fed, or when a printing instruction is input forcibly, the printer takes the first priority on the print jobs with conforming paper size received afterward.</p>
